

Crivitz School District
Student Health Screening Form

Student Name: _____

- This form must be completed at home before the start of each school day. It should be kept at home for ready access. Keeping sick children out of school is critical to controlling the spread of COVID-19. Please screen your child(ren) before each and every school day.
- If you answer “YES” to any question, DO NOT send your child to school. Notify school of the absence and reason/symptoms. This information will help us track illness in school. Please consult with your child’s healthcare provider if they have any signs or symptoms of COVID-19. See back side for illness school exclusion criteria.

Complete before the start of each school day (Answer Yes/No)											
DATE	Have you tested positive for COVID-19 in the past 14 days? *	Have you recently been tested for COVID-19 and are awaiting results?	Have you been in close contact with a person confirmed to have COVID-19 within the last 14 days?	Are you experiencing a cough, shortness of breath or difficulty breathing or a sore throat?	Have you had a new loss of taste or smell?	Have you had new muscle pains or chills?	Have you had a new onset headache?	Have you had new nausea, vomiting or diarrhea?	Have you had a fever in the last 48 hours (>/= 100.4 F)?	Is your current temperature >/= 100.4 F?	DAILY TEMPERATURE

* If you have tested positive for COVID-19, but have met the Department of Public Health criteria for discontinuation of isolation-you are free of fever (without the use of fever reducing medication) for 72 hours AND 10 days have passed since symptom onset AND respiratory symptoms have improved- you may disregard this question.

How long should my child be out of school? This is a complicated question, hopefully the information below will help clarify the answer. When in doubt contact your school nurse to make sure it is safe to return after your child has any illness signs or symptoms.

If my child has a COVID-19 test done, should they stay home while awaiting results? Yes.

What if my student becomes sick (with any sign/symptom of COVID-19) but isn't tested for COVID-19?

They should stay home, in isolation, until they are feeling better and all the following have happened:

1. At least 10 days have passed since their symptoms started **and**;
2. They haven't had a fever (100.4°F or greater) in at least 72 hours without using any medication to lower fever **and**;
3. Their cough or breathing problems get better.

How long does my student need to stay home if they tested positive OR a doctor said they likely have COVID-19?

If your student has symptoms they should stay at home and away from others as much as possible until all three of the following have happened:

1. At least 10 days have passed since their symptoms started **and**;
2. They haven't had a fever (100.4°F or greater) in at least 72 hours without using any medication to lower fever **and**;
3. Their cough or breathing problems get better.

What if my student tested positive for COVID-19, but doesn't show symptoms (asymptomatic)?

They should stay home 10 days after the day they were tested and keep away from other people as much as possible. This is because even if they don't have symptoms, they can still spread the virus.

What if my student becomes sick but tests negative for COVID-19?

They should stay home until they are feeling better and they have not had a fever for 24 hours without using any medication to reduce fever. If they visit a doctor and they tell you your student has something other than COVID-19 (like the flu or hand, foot, and mouth) then you should follow the doctor's guidelines for exclusion requirements for that disease. Review the Wisconsin Childhood Communicable Diseases Wall Chart, P-44397 for additional information. <https://www.dhs.wisconsin.gov/publications/p4/p44397.pdf>
